

Amateur is good!

The foreign language education full up since 2018.

The foreign language class for 5,6 grade and the foreign language activity for 3,4 grade starts at elementary school.

The 2/3 elementary school teachers teach the foreign language.

But there is an issue about that, because teachers of elementary school have not studied how to teach the foreign language to the pupils by university curriculum.

The MEXT (monbu-kagaku-shou) and education committee make the study program.

And the super visor guide and advise to the teachers.

The members of prefecture, city and town assembly worry about teacher's guide.

The MEXT will supply 1000 teachers who teach foreign language at elementary school.

But I do not worry about that.

Almost Amateur teacher know "that I can't use foreign language".

This is same about elementary pupils mind.

I think elementary school's teachers have motivation about self-study and growing.

Amateur is good!
