

Too difficult!

All teachers say that motivation for study is important.

We educational officer agree, too.

When we, educational officer, make the educational policy, we must explain outline of it to the officer of finance.

We plan various activities.

For example, meaning with study, teaching plan with subject and jobs, career planning, lecture by the workers, and so on.

But finance don't understand what we do. They say to me "All school always do that".

When civil-work plans make road or bridge, finance admit that. Because road or bridge are old and danger, and they are visible.

But education issue, for example motivation, is NOT visible.

Oh we don't know what we do!

I have ever heard one.

Making policy is THEORY and PASSION.

I must have skill of persuasion with THEORY and PASSION!
