

Which is better ?

When I was a young teacher , about 20 years ago , the school system was said as “OLD style”. Because , school has many teachers and only two managers , school master and head teacher”, so to speak “ Flat style “.

So education committee and manager told us , the importance of triangle system that has cheaf . Today almost school is triangle style , school master – head teacher – cheaf – teachers . Recently the issue of school is so complex and No answer .

We must treat about the issue with team work !

But we need speed and judgement , when we settle the issue .

This year’s new year’s party , young worker who belongs venture business .

They told me about their company .

The boss of the company want to make the FLAT system.

The one reason is speed , but most important reason is another.

Today big and famous companys make the troubles.

Head needs what happen about company and customers .

Well , which is better about “ TRIANGLE “ or “ FLAT “ ?

It’s important issue about the school and students , pupils.
