

Approach

2019 has started.

I want to make this year 2019 nice!

We have 1 year to start elementary school's new national standard curriculum.

What must elementary school do this year?

Needless to say, elementary school must complete and try new curriculum.

New curriculum of elementary school depends on the new text book.

And 5,6 grade English class is twice per a week, so elementary school must create new time table and its running.

Of course junior high school is same.

Especially programming education curriculum is important.

Because, English is under transitional measures, but programming education will starts on 2020.

We have 15 months until starting. It's too short!

We must do absolutely and deliberately.

Good luck!
