

## Choice

The schools have many problems and subjects.

Regarding classroom,

Rise scholarship, Corresponding special support education, Nice teaching, Active-learning, etc.

But all teachers are not proper teachers and expert (veteran) teachers.

Many teachers are young and part-time teachers.

And class room is noisy, nervous.

In this situation, teacher must make active-learning.

Of course teacher must complete all problems.

It is too difficult.

Then how does teacher do?

I think teachers must make the plan about settlement.

And teaches must choose importance and order of ways.

Teacher must do what you can.

Teacher is not Super-person!
