

## COMBINATION

Someday of last week, I watched NHK TV program about economy.

The program introduced new president of YAHOO Japan.

He said about his company.

“At one time, YAHOO Japan was innovator of IT business, but today, YAHOO Japan is one of them, We are chased by new companies.”

He continued,

“I think that YAHOO Japan may not continue future, if it will continue we do something.”

I don't think this comment is NEW, but next comment is NEW.

“We continue to be an innovator, we will not make new but combine things that there are now.”

Seeing about school, there are many job and we must decrease jobs.

So we should follow him.

I think the solution is “INNOVATION IS COMBINATION”.
