

Cooperation

We always listen the word “cooperation” in the education and welfare.

We have tried to make the cooperation between elementary school and junior high school in a region.

I think that school's cooperation is completed because of small era, same students, limited 9 years.

Today I saw the news about child abuse in Chiba prefecture.

The bad points of this case is the mistake action of education committee.

The education committee had only communication with child consultation center.

Several months ago, there were another bad case between Kagawa prefecture and Tokyo metropolitan.

The Chiba's case is negligence, education committee had only to communicate with child consultation center.

The Tokyo's case is businesslike, both officer had better communicate face to face.

(I've thought that Kagawa should protect the child before her moving to Tokyo.)

I think that cooperation needs face to face communication, time, money, eagerness.

Persons must move!
