

## Course

In Ishikawa prefecture, most school child (elementary school students) enter municipal junior high school near their residence.

Because the local prefecture such as Ishikawa has many municipal school and a little private school and it stands far from student's home and many friends enter near municipal JHS.

There are 2 private JHS and 1 national JHS and 1 prefecture JHS and 2 private JHS will establish within some years.

So private school and prefecture school eager to gather students.

But each private and prefecture JHS has distinctive school tradition and has 6 years continuous studying system.

No entrance examination to high school is distinctiveness.

If students want to enter private and prefecture JHS, students and parents must understand its aim and system.

So private and prefecture JHS must explain its information to students and parents.

I think that 6 grade school child has various course to make own career.
