

Exercise

Basically teacher and students use English during class.

In other word “Basically teacher must teach English with using English only.”

Because of students who have learned foreign language enter junior high school, teacher must do so.

The one aim of English class is promote of speaking skill.

So English teachers belong to junior high school make it rule to performance test in English curriculum.

But it takes much time for each face to face performance test.

So there is good way to solve this problem.

That is to use ICT not tablet but desk top computer at PC-room and use hand-made easy systems.

First of all, teachers and ALT make contents.

This content is made by smartphone or digital camera.

For example, “School course”,

Teachers and ALT talk to students,

1 Hello. How are you?

2 What is your name?

3 What is your school?

4 What subject do you like, and why?

5 What club do you belong to?

6 etc.

Another contents are “At house”, “At town”, “At station”, “At bus stop”, “At Kenrokuen”, ...

So most of all students study individually with using this contents and some students talk with teacher and ALT. (performance test in English).

I want make an opportunity to talk with others.
