

## Family Talk

I read the result and analyzation of National scholarship test.

I was interested in the study at each house.

The scholarship relate with some points.

For example, the points that student studied homework at own house and student studied by his plan.

Perhaps almost parents understood and agreed with these points.

But I aim at one point.

That is "TALK with his family at home about school and friends".

What makes to relate with scholarship.

They are "nice atmosphere" and "review of his life" and "presentation".

I think they concern with scholarship.

Let's make family talk and have a good time at your house!
