

Flexible use

The MEXT got the 1000 special course teachers who teach English activity at elementary school.

The teacher has license about teaching English for JHS's students and CEFER degree.

The national finance kept 1000 teachers for work style reform.

So special course teachers must all English activity classes at that elementary school.

Some teacher feels happy because of lose their classes, but some teachers feel bad because teacher don't teach English activity their pupils.

Today, many teachers have motivation for becoming nice teacher and getting skills teaching English activity.

Judging from this situation, the way that the special course teacher and class room teacher teach this class is best!

So I want MOF and MEXT to admit flexible use of special course teachers.
