

Gap

I planned exhibition last week.

That is Kanazawa Nishikigaoka Junior High School students' works exhibition.

This school is excellent school.

Because there are teachers who are good at teaching subject and there are students who study subjects volitionally.

We are able to see active learning at many classes every day.

So I wanted to show this school to many people living in Ishikawa prefecture.

I went the exhibition place to hear impression of visitors.

Some are "Nice", "Good", "Beautiful".

But one visitor told with his partner "What is this school?"

Unified school system is not known to people.

Because I have been teacher and am a person concerned about education, I know about this school and system.

Most people don't know about that and no interests.

Story change, the information about community school near my residence comes to me by circular notice.

Most people living our community are not interested in it.

I found that there are large GAP between a person concerned about education and the citizens.

I must consider another or new plan.

石川県立錦丘中学校を広く県民に知ってもらうために、生徒作品展を開催した。

一部の参観者は、「どんな学校？」と言った。

我々教育関係者は当たり前と想着いても、市民には伝わっていない。

回覧板に地域運営学校の取組があつたが、町会員には全く関心がない。

教育に関し、関係者と市民の間に大きなギャップがありそうだ。
