

Homework

When every day's radio exercise, I ask children "Have you finished homework ? "

All children answered "Not yet".

I asked them what kind of homework teachers give.

They replied "kanji, calculation, book reading description of one's impression, research, etc."

I felt it's same our children's days.

About 20 years ago, it started 5 school days system in a week.

Everybody said "Return children to the society."

So schoolmaster said to teacher about homework of summer vacation,

"You must give to children research, art, not drill of kanji, calculation."

What kind of homework during summer vacation does teacher give to children?

I think the homework is what children do only summer vacation.

And we give children free time.

But teachers worry about the down ability of children's writing reading calculating.

What we must do is appropriate kinds and quantities of the homework.
