

Interest

About 20 years ago, I belonged to one municipal J.H.S.

The school was nice school, but there were some naughty students.

Some smoked, some were dyed hair, and so on.

I and other teachers tried student guidance every time every day.

I always told with their parents and went police and courthouse.

Thought they did bad activities, they were kind and anxiety but they love school.

So we, teachers and their friends tried that they came to school.

I, teacher tried to make the pleasant class.

For example,

I welcomed foreign students to my classroom. (I belonged to the JRC program.)

I welcomed ALT my science class and class room activity.

I made the long walk (20 km) school trip.

They absented for school every day, but came to school at the day or the classes.

Teachers must make the classes that students have pleasant and interest!
