

J.H.S

New national standard curriculum has started.

We see new topics, for example, foreign language, programming, 10 figures I want you to grow up until the end of childhood, ..., at elementary school, kindergarten and high school.

But, it is not true.

The junior high school that is between elementary school and high school change significantly.

Perhaps fresh students from elementary school talk to junior high school teacher with using English friendly.

I worry about junior high school teacher's answer,

"I am not English teacher." (eigo no sensei ja nai)

"I am not good at speaking English." (eigo wa nigate)

"I can't speak English." (eigo wa shabere nai)

If that is so, fresh students feel disappointment.

So we avoid this case, junior high school teacher MUST understand the change of elementary school curriculum especially English (or English activity).

At 3 month (January, February, March), all junior high school teacher, not only English teachers but all subjects' teachers, had better go and see the English activity class and understand elementary school students' learning.

If possible, I want to plan English festival that all students and all teachers participate at junior high school. At there, we communicate with using English only.

I wish junior high school teachers' challenge.
