

## Praise

Japanese Cabinet decided “The 3<sup>rd</sup>. term basic plan about new education”.

The term is since 2018 until 2022.

The things concern about school education is “The promotion of children’s self-esteem”.

When we tried the questionnaire to the pupils or students, they answered “low” about self-esteem.

Someday NHK TV program show the topic.

One little girl had started to show the dance on the stage with some friends.

But she can’t dance because of shameful.

At that time, her father went up stage and talk to her “You are good dancer, I love you”.

She started dance with her friends and her father.

I think she gets confidence and self-esteem by her father’s praise.

Maybe I went up stage and talk to my child “Why don’t you dance, Don’t cry ! ”.

If we educate self-esteem, we have to keep praise, acknowledge, encourage.
