

Red pen

When we visited to junior high school we saw the students' reports or notebook with teachers' red color pen comments in recent years.

In spite of reforming teachers working style, most teachers wrote comments on students' works.

So the students who saw teachers' comments have their volition and have the just points of advanced scholarship.

I was surprised to know the existence of teachers (or junior high school or town or city or ...) who (that) don't have "red pen" custom.

One day, teachers or officers who visited one junior high school and saw red pen comments said I have never seen red pen comments except this junior high school.

I think that there are various thought and our normal practice is not normal.

But I keep writing red pen comments to students.
