

## Share of school

Since next month (April) , school and teacher must teach by new national standard curriculum general rule.

National standard curriculum show the importance of ability of application, so teachers must educate to student and pupil thinking judgment expressive power through the elementary school to the high school (all kind school).

All schools teachers make the new school's curriculum.

But I have a QUESTION.

I think about elementary school pupils, first of all, pupils must get much knowledge.

At elementary school, much time getting knowledge and experience, a little time getting ability of application.

At junior high school and high school, much time getting ability of application.

The MEXT (moubu-kagaku-shou) shows at National standard curriculum,

"Depending on the developmental stage"

If I am school master of elementary school, BOE ask me "What school you manage (or make)? "

I answer "The school that pupils get basic skills surely".

What I insist is "share of school".
