

## We have to use various situation

I watch TV program about the activity of university student.

The activity is international aid program for the Asia.

Students seem nice study and make good plan.

But they think they have weak point.

As you know it is communication using English.

Presentation of own plan with English is good (or No problem).

But students worry about that question to the presentation or answer to their question.

I think they had better use not only presentation but discussion about the plan among Japanese.

They should use English all situation about this program.

Recently teachers make the chance of using English out of English class (or lesson).

Since 2018, 3 and 4 grade elementary school pupils learn English activity.

I think English is skill of communication and basic of study.

The most important thing is use of English at many situation .
