

Smile

Last day, I went to some junior high school.

I had a chance to see some classes.

Most of teachers taught students with good skills, for example, using ICT, white board, group talk, etc.

But I felt a little worry.

That is, some teachers told to students with not seeing students but seeing to PC, and no smile.

Another teacher use timer and say “Think (or talk) within 3 minutes”

I felt that it is not classes but cooking show.

And teachers like this type are young.

I think classes plan is important, using some materials is important, but most important is good communication.

Teacher is not workers who make manufactures, but professional who educate human.

Near future, teacher must return primary stile.

.
