

Tokyo value

I have a chance to talk with parents living in Tokyo about their son and daughter.

I ask to them “ Do you think the choice of your children’s school, don’t you ? “

They answered with difficult face, “ what’s a difficult issue. ”

In Tokyo, there are many private school not only university and high school but elementary school and junior high school.

And they (private schools) have various characters.

Some schools teach subject with use English, some schools do not follow the national standard educational curriculum, or International Baccalaureate, and so on.

Some parents make their children enter the International school, not under the national standard educational curriculum.

Change the view to Ishikawa, most parents and children study at school that follow the national standard educational curriculum.

And “Go and enter To-dai ! ” (Laugh)

New national standard educational curriculum aims to educate children living in the future.

I have a pleasure with some worry and fear.
