

Various

This weekend I visited Tokyo to take part in seminar of graduate school.

I had a little free time, I walked around one city.

I had been a teacher, so I wanted to see educational facilities.

There are some schools.

They are junior high school, combined junior and senior high school, night junior high school.

Moreover prefectural combined junior and senior high school stands next to municipal junior high school.

Though many population, I was surprised this situation.

In Ishikawa two school's Win-Win, but in Tokyo two school's competition.

Each school must show and have its mission.

Prefectural combined
junior and senior high school

Municipal junior high school
(Night junior high school)
