

Writing

School Education Law rules elements of scholarship.

They are “Thinking Judgment Expressive power”.

So at school, teachers bring up students and pupils that power by daily classes.

Students and pupils discuss about issue given by teachers.

And they presents by contents with using computers.

Recently, I told with friend living my neighborhood, he told me that the child didn't write compare with his generation.

I agreed with him.

Last year the officer belongs to MEXT (monbu-kagaku-shou) told us that amounts time of writing, repeat, drills is decrease.

I also think so.

The new national standard curriculum shows the needs of repeat study.

I think that pupils must repeat writing letters and pictures on paper by pencils for getting basic skills.

Basic skills make students and pupils getting application and thinking judgment expressive power.

Education style is change but child is not change, I believe so!
